

Diplomat® Managed File Transfer

Quick Start Instructions - Trial Release v5.3

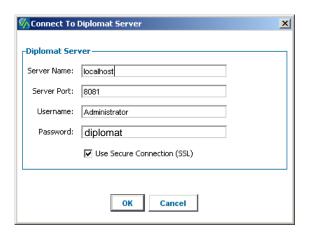

- 1. Go to www.coviantsoftware.com/free-trial-diplomat-mft.php. Download a free trial copy for the desired edition of Diplomat Managed File Transfer. www.coviantsoftware.com/free-trial-diplomat-mft.php. Download a free trial copy for the desired edition of Diplomat Managed File Transfer. www.coviantsoftware.com/free-trial-diplomat-mft.php. Download a free trial copy for the desired edition of Diplomat Managed File Transfer. www.coviantsoftware.com/free-trial-diplomat-mft.php. Download a free trial copy for the desired edition of Diplomat 32-bit installation is NOT SUPPORTED on 64-bit systems.
- 2. On the system where Diplomat Managed File Transfer is to be installed, create and log into an account to be used as the logon identity of the Diplomat Trial Server service. If you are installing on a Linux system, create directory /opt/coviant/diplomat-trial using an account with the appropriate privileges.
- 3. Start the installation.
 - § Windows
 - § Open the trial zip file and double-click on DiplomatTrialSetupx.x.zip or DiplomatTrial64Setupx.x.zip. Double-click on Setup.exe.
 - § Select the Diplomat MFT Edition you would like to install.
 - § Select **Complete** to install both the Diplomat Server and the Diplomat Client on the same system using the default location (C:\Program Files\Coviant Software\Diplomat-trial).
 - Enter the logon information for the Windows account to be used with the Diplomat Server service or select **New User Information...** to create a new Windows account. You can use **Browse...** to select a DOMAIN and Username ensures that DOMAIN/Username is entered correctly. **NOTE:** A logon account with Administrator privileges is REQUIRED when running on Windows 7 or Windows Server 2008 R2.
 - § Red Hat Linux
 - Sopen the trial zip file and double-click on diplomatTrialServerx.x.tar.qz or diplomatTrial64Serverx.x.tar.qz to open the tar.qz file.
 - § Unzip all files into opt/coviant/diplomat-trial.
 - **NOTE:** Only the Diplomat Trial Server will be installed as the Diplomat Trial Client is not supported on Linux. You must download and install the Diplomat Trial Client on a Windows system to access the Diplomat Trial Server. Follow the Quick Start instructions for Windows and select **Custom**, to install only the Diplomat Trial Client.
- 4. Start the Diplomat Trial Server service before attempting to start the Diplomat Trial Client.
 - On a Windows system, the Diplomat Trial Server is set up automatically as a Windows service named Diplomat Trial Server or Diplomat Trial Server 64. The Diplomat Trial Server service is set to start automatically on reboot or you can manually start the service through **Services** under the Windows **Control Panel**.
 - § On a Linux system, to set the diplomatTrialServer daemon to start automatically on system reboot, log on as 'root' and execute the setup script at /opt/coviant/diplomat-trial/setup, which copies the diplomatTrialServer daemon into the /etc/rc.d/init.d directory. Or, start the service manually with the 'service diplomatTrialServer start' command.

You can confirm that the Diplomat Trial Server service is working properly by opening a browser window and navigating to https://localhost:8081 which should display the Tomcat home page. If you receive a message from your browser indicating a problem with the web site's security, select *Continue* to access the Tomcat home page.

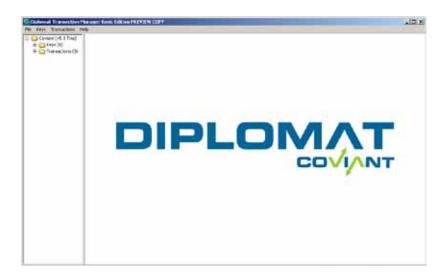

5. If firewall software is running on the Diplomat Trial Server system, check to ensure that it is configured to allow Internet access for the Diplomat processes. The server service name is *Diplomat Trial Server* and the process name is *tomcat*.exe* or *tomcat*_64.exe*. These files are located in the ...\Diplomat-trial\tomcat\Webserver\bin directory or your corresponding install directory. The process name that the Diplomat Client uses to access the Internet is *javaw.exe*, which is located in the ...\Diplomat-trial\jre\bin or your corresponding install directory.

6. Double-click on the Diplomat Trial Client icon on your desktop. Enter the server name 'localhost', port number '8081', and Diplomat password 'diplomat'. If you uncheck *Use Secure Connection*, enter port number '8444'. You will be prompted to change the password. New passwords must be at least 6 characters long and contain both alpha and non-alpha characters.

7. You should see the main screen of the Diplomat Trial Client.

8. Select Transactions > Create Inbound Transaction... or Transactions > Create Outbound Transaction... from the top menu bar to set up a test file transfer job. At a minimum, you must complete the Source File(s), Source Partner Profile, and Destination Partner Profile fields. You may use '*' as a wildcard in the Source File(s) field.

When you have finished setting up your transaction, click the Run Now button to initiate a test file transfer job. Use the Save button at the bottom of the screen to save your test transaction for later use.
